Worksheet for the academic year 2023-2024
Class: $5^{\text {th }}$
Subject: Maths
Date : 04/01/2024
Lesson: 6 - Basic Geometry
Fill in the blanks:

1. An angle more than a right angle and less than a straight angle is called an $\qquad$ angle.
2. $\qquad$ has a starting point and an end point.
3. We can use a $\qquad$ to measure angles.
4. $\qquad$ is the symbol for an angle.
5. A $\qquad$ is a part of a line which has a starting point but goes endlessly in other direction.
6. Right angle measures exactly $\qquad$ $\therefore$.
7. An angle whose measure is $45^{\circ}$ is an $\qquad$ angle.
8. A $\qquad$ is the unit used to measure angles.
9. An angle whose measure is exactly $180^{\circ}$ is an $\qquad$ angle.
10. A $\qquad$ extends endlessly in both direction.
11. Two lines that intersect and form right angles are called $\qquad$ lines.
12. A $\qquad$ is a basic unit of geometry.
13. The point where two rays meet is called the $\qquad$ .
14. Write the measure of the following angles:
a)

b)

15. Write the type of angle for each of the following:

16. Use a protractor to find the measure of these angles:
a)

b)

c)

d)

17. Write the given pair of lines are whether parallel or perpendicular lines :
a)

b)

c)

d)
