Dear Student,

Greetings!

*Without leaps of imagination, or dreaming, we lose the excitement of possibilities. Dreaming, after all, is a form of planning. - Gloria Steinem*

The academic year 2023-24 has been studded with ongoing activities for your overall development although learning is our primary objective. To help you through, I want to give you some tips and advice to help you perform to the best of your ability.

**1. There is enough time to make significant improvements in your grades**

The time studying at home and in revision classes will have a significant impact on your results, right up to the moment you walk into the exam. Keep working hard and use every moment you can to make that next grade.

**2. This is nothing to do with luck**

There's nothing called luck in the examination without studying the lesson. No one will say those students who do well have been "lucky"; work hard and put the effort in and you will see the benefits.

**3. Prioritize your time**

Over the next few weeks, your exams must be your number one priority. This is the time to be disciplined about how you use the precious time you have.

**4. Use the staff to help you achieve the top grades**

Don't sit at home worrying about some content you are struggling with, ask your teachers for help as they are the experts. They will always find time for you, and five minutes with a teacher could save you hours.

**5. Work hard at home**

Evenings and weekends are long enough to fit in relaxation and revision. Each evening, you should be studying for 2 hours (not including your Period 6). Split your weekends into 3 (mornings, afternoons, and evenings) and study for 2 out of 3.

**6. Reward your hard work with some 'down time'**

Relax, get outside, and do some exercise. Studies show that students who punctuate their revision with exercise outside do better in their exams.

**7. Be honest and ruthless with your distractions**

We all have distractions in our lives that stop us from doing what we need to do. Be disciplined with these distractions, whether this is your phone, your PlayStation or something else. For the next few weeks these must be managed. You will have plenty of time once the exams have finished!

**8. Be Organized and prepared for the day**

Use your exam timetable to know when and where your exams are. The morning of the exam can be very busy and therefore preparation is key. Each night, make sure you have all the necessary equipment for the next day. If you are not sure on what equipment you need, please speak to your Team Tutor.

I believe in you and your ability and look forward to celebrating with you at Prom and Results Day.

Best wishes,

Laurance Varghese

Principal

### ***Ways to help your children...***

- 1. Keep your child healthy. Seeing, hearing and feeling well are essential to learning.**
- 2. Talk and listen to your children. The more words a child can understand and say, the easier it will be for him or her to learn to read and understand. Your children will learn to express themselves if they know you will give them your attention.**
- 3. Praise and encourage your children. Praise and recognition reinforce learning. Praise them when they succeed and help them when they have problems.**
- 4. Be patient with your children.**
- 5. Avoid comparing your children. Each child is unique. Do not harp on previous failures or results.**
- 6. Schedule home study on a regular basis. To succeed in school many children need a regular study time each day free from interruptions and distractions.**
- 7. Set a bed time and stick to it. Your children will be in a proper frame of mind to learn only if they report to school each morning well-rested.**
- 8. See that your children's school attendance is excellent. When children miss school, they miss the presentation of new information or the mastery of a new concept.**
- 9. Make family mealtimes meaningful. Mealtime can provide the ideal setting for talking together, sharing events of the day and discussing individual problems and aspirations. Such discussions will help develop your children's self-confidence and encourage them to speak up in the classroom.**
- 10. Make television your servant, not your master. Children learn a lot from television - good and bad. Help them choose appropriate programs to watch. Then watch with them and, afterwards, discuss what you've seen.**
- 11. Every child has limitations to their abilities. Accept their limitations and help them to set goals to increase their self-esteem.**
- 12. Provide a wide variety of reading materials in your home. If you have books, magazines and newspapers readily available and in use, your children will see that reading is source of pleasure and information.**
- 13. Give your children books as birthday or holiday gifts.**
- 14. Help the child to develop self – discipline, self-direction, self-confidence and a sense of accomplishment and maintaining his/her confidence especially when he/she seems discouraged by grades. Do not displace your anxiety on the child.**
- 15. Provide areas of responsibility: Determine responsibilities for your child according to the emotional and chronological age. Start with a simple chore, and add responsibility as your child shows ability to complete a chore unattended.**
- 16. Create structure and discipline. Without proper discipline, your children will feel out of control. Keep it consistent and let your children know ahead of time what the consequences are for their actions.**
- 17. Catch your child being good. A simple word or touch to let your children know you appreciate how good they are being will increase their desire to be good.**
