

## "Live the Lockdown"

The corona virus has changed how we work, play and learn. Schools are closing, sports leagues have been canceled and many people have been asked to work from home.

The life of every child across the country has been turned upside down by covid-19. During this lock down I am missing my friends and outing. I would joke about not having school but now I am here. It's not as good. In this situation everyone is really struggling. At present with lockdown and lack of routine. My closest friends whom I used to regularly visits are rightfully

practicing social distancing. For us this means only connecting through our phones.

I'm trying to learn new things and keep my brain active. All we can do is be present, follow the guidelines

Stay home - save lives

Stay home as much as you can.

Keep a safe distance.

Wash hands often.

Cover your cough.

Sick? call ahead.

I wish this pandemic should come to an end.
